PROFILE

Professional software engineer with 4 years of experience in digital projects. Conduct business analysis and develop digital technology as a powerful solution for organisational success. My strength is in work efficiency and accurate understanding of system problems. My proud projects are Kedungpuji Village population surveillance web system (2019), Web Profile and Journalism of Ponpes ZIIS (2022), PT Trans Indonesia Supercorridor Mail Application (2023), LMS and CBT of Ponpes ZIIS (2024) and Lab Qualis Indonesia Testing Management System (2024). Now I explore and expert in php programming with Laravel as a fullstack developer at PT Nusa Data Hexamatika under PT Trans Indonesia Supercorridor.

WORK EXPERIENCE

Full Stack Developer

PT Nusa Data Hexamatika 2022 - current

- Product Certification Management - PT Qualis Indonesia.**
 - Web application for product certification management and monitoring which includes registration, scheduling, sampling, audit, and certificate issuance processes at PT Qualis Indonesia.
- Internal Company Email System - Trans Indonesia Supercorridor**
 - Web-based mail application for internal companies that is used as a medium for correspondence and dispositions that are legally enforceable according to company rules.
- Produk Sales and Customer Dashboard - Idplay**
 - Regular product information content management system application from IdPlay. Must be able to display relevant promo information and registration or payment functions for customers.
- Key Performance Indicator Management - PT Jembo Cable**
 - Application is used to monitor and measure the performance of an organisation or individual in achieving predetermined targets. The app helps users set, track and analyse KPIs based on relevant data.

Full Stack Developer

Personal Project 2019 - current

- Qlead Portfolio**
 - SaaS website product idea for personal and professional portfolio. We built an API service to manage portfolio data such as personal profile, resume, skills, experience, education, gallery, testimonials, projects, blogs, contacts, and other informations.
- Learning Management System**
 - The system manages various important aspects of school operations, such as data on students, teachers, homeroom teachers, study groups, school year, classes, subjects, lesson schedules, and extracurricular activities. The system also manages exams and school assignments, from planning exam schedules, printing exam cards, determining exam takers, to assessing exam results and creating student report cards.
- CMS Company Profile.**
 - Dozens of web-based CMS for companies, agencies, professionals, and individuals
